

# Idea Process

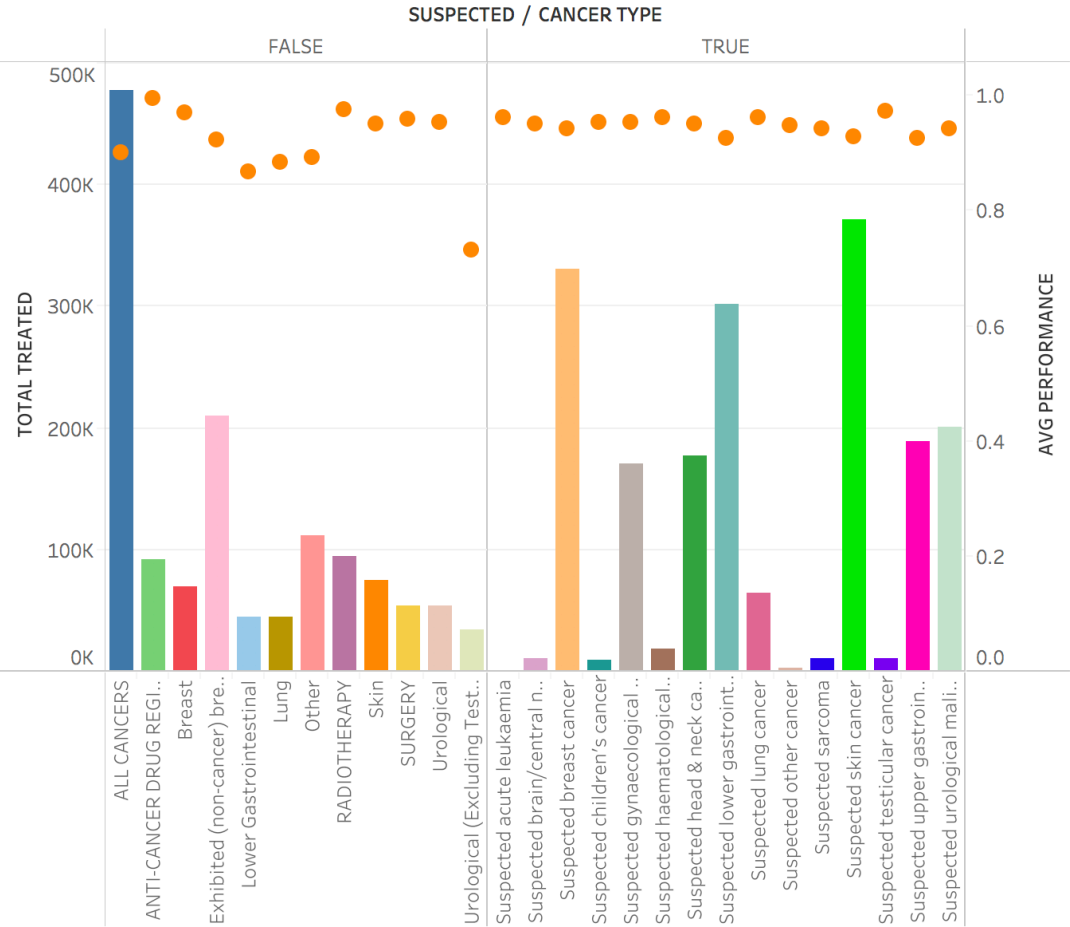

170008965

The aim was finding the correlation between performance and other attributes, the final visualization aimed at joining as much aspect as it can to show the correlation of performance with each one of the attributes without making the visualization hard to read. The following graphs are ideation processes. The sketch in sheet 4 and 5 was selected for final visualization. Sheet 4 combined all aspects in three former sketches and sheet 5 can convey a trend of performance when number of total treated patient increased.
